### **4. Security, innovation and energy productivity**

**The Government seeks comments on ways the Goals set out at the beginning of this chapter could be achieved.**

**Provide your response in this box:**

We are now exposed to the global supply chain of liquid fuels. Our refining capacity for traditional crude continue to decline. Strategic policy must focus on reducing this dependency and re building Australia on a platform of "Fuels self sufficiency". We do not have the time to wait for renewable energies to get to the pint that they can supply base load capacity in ANY of the fuels area, and in the interim, must rapidly develop practical nearer term achievable solutions that can see us through the next 30 years, while renewables develop.
